

Moduly podstawowe

Parser

```
parseComplexQuery(FILE *inp);
```

Analizator

```
analyse(ComplexQuery complexQuery);
```

Translator

```
translate(ComplexQuery complexQuery);
```

Baza

```
getXmlFromQuery(char* query);
```

Moduly wymienne

Translator interface

```
getResult();  
initSingleQuery();  
mergeLines(char *line, int fieldId, int notFirstLine);  
translate_or(int fieldId, char *expr1, char *expr2);  
translate_and(int fieldId, char *expr1, char *expr2);  
translate_not(int fieldId, char *expr1);  
translate_star(char *textFrag1, char *textFrag2);  
translate_simpleText(int fieldId, char *text);
```

Baza interface

```
Tablets* getTablets(char* query);
```
